

SUPPLY CHAIN SECURITY MANAGEMENT ISO 28000

WHY CHOOSE MSS GLOBAL?

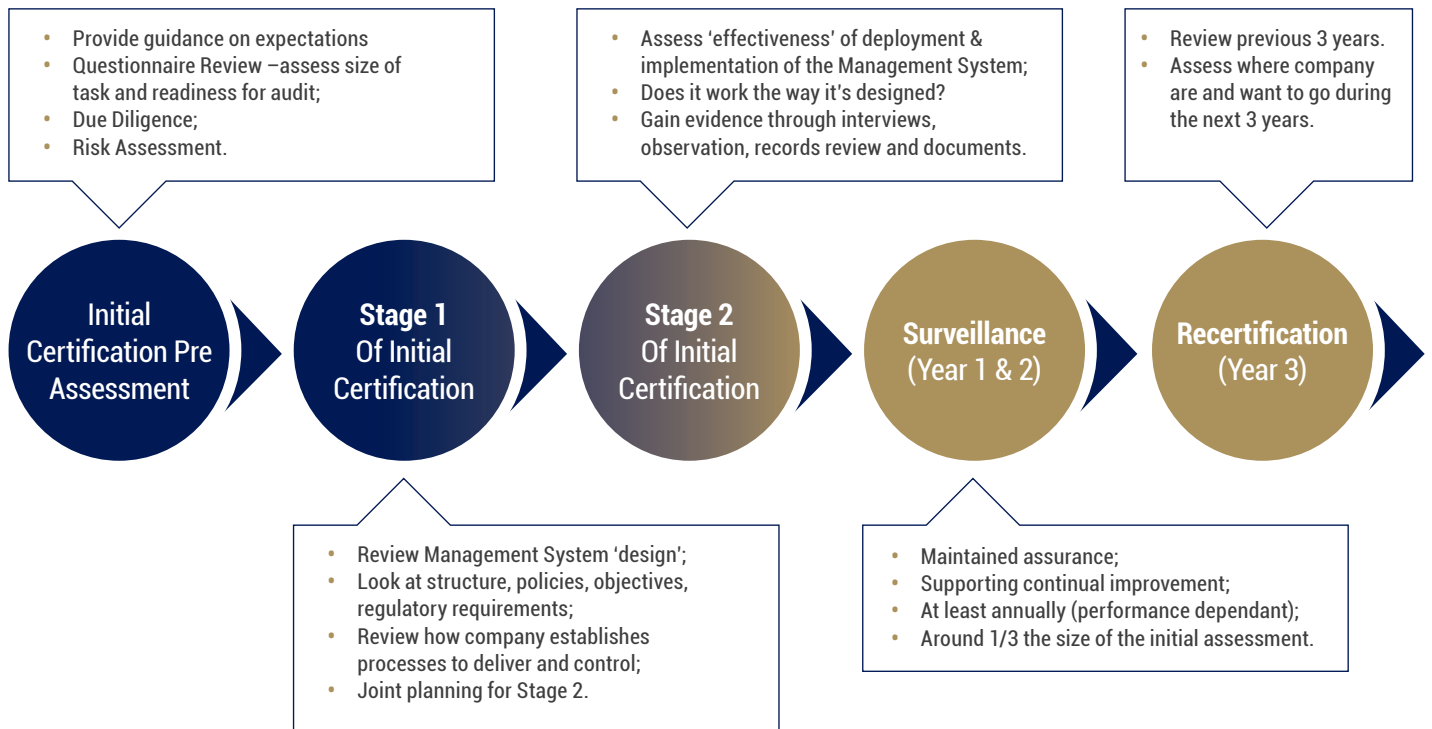

- We are a client focused accredited Certification Body that has unparalleled security sector experience;
- We are not a 'generic' Certification Body;
- Our assessment is efficient and effective – we understand your challenges, and talk your language.
- As operators who are borne of and understand your enterprise wide risks, we have unparalleled international knowledge to support your certification.
- MSS Global are on the UK committee for the development of a number of international standards.
- Value for money investment: initial certification lasts for 3 years subject to annual surveillance, enabling you to bid for contracts where this standard is a conditional requirement.

Contact info@mssglobal.com to help you achieve certification. We can give you an understanding, provide you with gap analysis, and point you in the right direction.

THE BENEFITS OF ISO 28000

- Certification to ISO 28000 provides a credible means of demonstrating effective supply chain security Corporate Governance – from Board level, to physical delivery;
- The standard covers every key aspect of the way an organisation secures its supply chain;
- It provides senior management with assurance that the organization is able to effectively manage supply chain risks to its operation including its upstream and downstream dependencies;
- Certification by MSS Global, as an internationally accredited, respected, qualified and independent expert reinforces your credibility and helps protect your reputation;
- Organizations certified to ISO 28000 can be more confident about meeting the requirements of legislation, statutory and other security regulatory requirements.
- Your certification de-risks the service offering to your clients; it helps them protect their reputation, enhances their likelihood of operational success, and reduces their internal audit and due diligence burden;
- Your certification increases client confidence; you are able to demonstrate sustained performance through an enduring program of external audit; certification is a value for money 'assurance' investment.

THE CONTINUOUS IMPROVEMENT PROCESS: ASSURANCE THROUGH PERFORMANCE

ISO 28000 – KEY POINTS TO CONSIDER

- A Supply Chain Security Management System (SCSMS) – with a risk based approach at its heart;
- If you already have ISO 9001 accredited certification then you are likely to be well on the route to success;
- ISO 28000 helps you design and implement your security related management controls;
- It covers key aspects of supply chain risk management, placing a strong onus on you to identify upon who and how your operation impacts, and who impacts you - from clients, to regulations and legal governance, through to employees and subcontractors (including selection, training and on-going competence);
- It encompasses core and supporting business functions, and helps you manage your suppliers;
- Like any effective management control system, ISO 28000 needs to be driven by the senior management team, and resourced.
- ISO 28000 is not a 'tick box' standard.

HOW MSS GLOBAL CAN SUPPORT YOU

- We can help if you are unsure of the preparation required to achieve certification. We can give you an understanding, provide you with gap analysis, and point you in the right direction.
- We also offer education packages* to help you gain the most value from introducing the system.
